

Complete GI Activation-S

L-Glutamine-free formulation

Similar to **Complete GI Activation**, this version does not contain L-Glutamine.

Complete GI Activation-S is a unique and powerful formula specifically designed to support and enhance gastrointestinal health. This product stands out due to its comprehensive approach, not only addressing common GI issues but also fortifying the overall health of the digestive system. It balances the need for gut permeability for nutrient absorption while providing a strong defense against toxins, allergens, and pathogens.

This formula offers a complete spectrum of support for the GI tract, combining key ingredients that work in synergy to support intestinal health, digestive function, and overall wellness. This means you get the full benefits without the need for multiple different supplements. It is designed to cleanse, strengthen, and protect the GI tract, helping to fortify your body against environmental stresses.

Ingredient Highlights:

- **Colostrum (Pasteurized Bovine Pre-Milk)**

This is the initial form of milk produced by cows, rich in antibodies, growth factors, and nutrients. It supports immune function and has been shown to help in maintaining gut health and integrity.

- **Colostrum Polypeptides (PRPs)**

Also known as proline-rich polypeptides, these small bioactive proteins in colostrum modulate the immune system. PRPs are known for their ability to promote a balanced immune response, particularly in the gastrointestinal tract.

- **Immunoglobulin G (IgG)**

IgG is the most abundant type of antibody found in colostrum. It plays a crucial role in immune function by neutralizing toxins and pathogens in the GI tract, thereby supporting gut health and immunity.

- **Sunflower Lecithin (Non-GMO)**

This natural emulsifier aids in the absorption of nutrients in the GI tract. Non-GMO sunflower lecithin is a healthier alternative to soy-based lecithin, and it contributes to the maintenance of cell membranes.

- **Medium-Chain Triglycerides (MCTs)**

MCTs are a form of saturated fatty acid that is easily digested and absorbed. They provide a quick source of energy and are supportive of gastrointestinal health, particularly in terms of aiding nutrient absorption and providing metabolic support.

Recommended Use: Take four capsules twice per day or as directed by your healthcare practitioner.

Consult with your Integrative Holistic Health Coach or other healthcare provider about your specific circumstances and any questions you may have.
