

TCG Activation

Tissue, Cell, and Gut Support Plus Toxin Binding Support

TCG Activation contains synergistic blends of carbon-based humic and fulvic minerals that are being touted as a “miracle compound” because of their dramatic positive effect on the body. These soil-derived compounds known as fulvic/humic minerals are made up of short, medium, and long-chain carbons which allows them to be beneficial in many areas of the body, including the gut.

The Humic/Fulvic synergistic blends in TCG Activation has been shown to have many benefits for:

- Brain fog
- Detoxification of organs and cells and tissues
- Gut repair and healing for leaky gut
- Supporting the restoration of a healthy microbiome
- Directing water and nutrients into the cells
- Supporting Mitochondria function
- Binder, chelation, and detoxification of heavy metals
- Binder and detoxification of chemical toxins
- Binder and detoxification of mold toxins
- Binder and detoxification of parasite and pathogenic endotoxins
- Breaks up biofilms
- Exhibits antifungal properties (to address candida and fungal overgrowth)

TCG Activation

Tissue, Cell, and Gut Support Plus Toxin Binding Support

TCG Activation is both water and fat-soluble, which allows the humic/fulvic minerals to transport key nutrients for absorption across the cell membranes and tissues throughout the body.

It provides a superior alternative to other common binders used in detoxification such as diatomaceous earth, bentonite clay, and charcoal because humic/fulvic acids have better binding properties and it can be taken at any time of day, even with meals because unlike other common binders, humic/fulvic acids won't bind to nutrients. This is why humic/fulvic blends are known as smart binders.

It acts as a delivery system to transport nutrients from your food and supplements into the cells and tissues.

Its low molecular weight and low pH not only protect the nutrients from destruction by the stomach acid, but they also help deliver the nutrients to where the body needs them, the low pH increases its toxin binding ability, holding on to the toxins until they exit your body through your stool. Fulvic acids are able to transport more than 60 times their weight in vitamins and minerals into our cells.

TCG Activation has a synergistic blend of humic and fulvic technology combined with its "smart" delivery and binding capabilities to provide a new level of nourishment and detoxification and repair for the body.

Fulvic minerals in TCG Activation are formed from ancient plant matter when fulvic acid converts inorganic metallic and rock-form minerals into a biologically active form.

TCG Activation

Tissue, Cell, and Gut Support Plus Toxin Binding Support

This process is millions of years old. The cycle began with the decay of huge prehistoric plants, which deposited minerals into the soil to feed the growth of new plants. For millions of years, this cycle has created large deposits of humic minerals and fulvic minerals, preserved due to specific geological conditions. Large prehistoric fulvic mineral deposits are now being used to improve the health and wellness of the planet. Our raw material comes from the richest known source of fulvic minerals in the world.

TCG Activation contains more than 70 naturally occurring minerals, trace minerals, trace elements, 5 trace vitamins, fulvic acid, humic acid, 18 amino acids, and 13 additional organic acids. Because TCG Activation is sourced from mineral-rich soils, the amounts and exact arrays can vary by product and batch.

Supplement Facts

Serving Size 1 ml - 1 Dropper (18 drops)

Servings per container: 60

	Amount Per Serving	% DV
Proprietary Blend	315 mg	**
Fulvic Minerals		
Humic Minerals		

**Daily Value (DV) not established.

Other Ingredients: Reverse osmosis de-ionized carbon filtered water.

Recommended Use: Minimum of 1ml/day with large glass of non-chlorinated water or as directed by your healthcare practitioner.
